

Fund for Oncology Rehabilitation Research

The Oncology Section of the APTA is proud to offer a new Research Grant to support research that will add to the body of knowledge related to oncology and HIV/AIDS physical therapy.

You can support the improvement of rehabilitation related to cancer and HIV/AIDS. Your contribution to the *Fund for Oncology Rehabilitation Research* will be placed in an interest-accruing fund that will be used to pay for Oncology Section Research Grants. Our hope is that this fund will grow, allowing us to one day fund research using only the interest generated.

Your donation is an investment in the future of oncology and HIV/AIDS physical therapy research. Thank you for making a difference!
